

The scatter plot displays the relationship between the Corruption Perception Index (CPI) score (Y-axis) and the Human Development Index (HDI) score (X-axis) for various countries. The X-axis ranges from 0.5 to 1.0, and the Y-axis ranges from 0 to 10. Countries are plotted as points, with red dots indicating a CPI score of 10 and blue dots indicating a CPI score of 0. The plot shows a positive correlation between HDI and CPI scores, with most countries having a CPI score between 0 and 5 and an HDI score between 0.6 and 0.9. Some countries, like Japan and Australia, have high HDI scores and high CPI scores. Other countries, like Singapore and Luxembourg, have high HDI scores but low CPI scores. The plot also shows a cluster of countries with low HDI scores and low CPI scores, including Myanmar, Timor-Leste, and Sudan.
