

The scatter plot displays the relationship between the Corruption Perception Index (CPI) score (Y-axis) and the Human Development Index (HDI) score (X-axis) for 180 countries. The X-axis ranges from 0.5 to 0.9, and the Y-axis ranges from 0 to 10. Countries are plotted as points, with red dots indicating a score of 10 and blue dots indicating a score of 0. The plot shows a positive correlation between HDI and CPI scores, with most countries clustered in the upper right quadrant (high HDI, high CPI). Countries like Japan, Australia, and France are among the highest on both indices, while countries like Singapore and Luxembourg are at the bottom left (low HDI, low CPI). The plot also shows a dense cluster of countries in the middle right (moderate HDI, high CPI), including many European and Asian nations. A few countries, like Myanmar and Timor-Leste, are outliers with high CPI scores but lower HDI scores.
