

The scatter plot displays the relationship between a country's GDP per capita (Y-axis) and its Corruption Perception Index (CPI) score (X-axis). The X-axis ranges from 0 to 10, and the Y-axis ranges from 0 to 100,000. The plot includes a grid and labels for various countries. Red dots represent countries with CPI scores between 0 and 5, while blue dots represent countries with CPI scores between 6 and 10. The data points show a general positive correlation, with higher GDP per capita often corresponding to higher CPI scores, though there are notable outliers like Singapore and Luxembourg.
