

The scatter plot displays the relationship between the Corruption Perception Index (CPI) score (Y-axis) and the Human Development Index (HDI) score (X-axis). The X-axis ranges from 0.5 to 1.0, and the Y-axis ranges from 0 to 10. Countries are plotted as points, with red dots indicating a CPI score of 10 and blue dots indicating a CPI score of 0. The plot shows a positive correlation between HDI and CPI scores, with most countries clustered in the upper right quadrant (high HDI, high CPI). Countries like Japan, Australia, and France are in the top left (high CPI, low HDI), while countries like Singapore and Luxembourg are in the bottom left (low CPI, low HDI). The majority of countries are concentrated in the upper right, indicating that higher HDI scores generally correspond to higher CPI scores.
